

Team page

Teams/DebianPerlGroup - Debian Wiki

Welcome to the Debian Perl Group team page!

This page is merely intended to show temporary messages (a few days/weeks) or to hold work documents.

For reference information, please refer to our [homepage](#).

Announcements/Works in progress

We have recently migrated all the Git repositories to salsa.debian.org. Documentation updates are pending.

How to get involved?

You are considering to join the Debian Perl Group or were just added to the group on Salsa? Then our **Welcome page** ([english](#), [español](#)) should help you with your decision and your first steps.

Dump your lib*-perl package here

If you don't have time even for this, just send a signed mail to debian-perl@lists.debian.org and list the packages you want us to take over.

Open tasks

A list of open tasks, e.g. for [DebCamp](#), and minutes from our meetings, can be found [here](#).

Low-Hanging Fruit sessions

A LHF (Low-Hanging Fruit) sessions coordination page can be found [here](#).
